

Light Surface Conditioner

What is it?

A safe and effective surface cleaner for daily domestic and industrial workspaces.

- Restores microbial balance to surfaces
- Freshens air
- Deodorises indoor surfaces, such as carpets and mattresses
- Decontaminates fruit and vegetables from pesticides and chemicals
- Conditions dishwashers, washing machines, pipes and drains
- Conditions toilets and basins to neutralise pathogens

Ingredients

- Structured water using MEA Water @Devices (www.meawater.com)
- Diverse and abundant range of beneficial microbe cultures
- Proprietary Essential Oil Blend

How to use

Spray **Light Surface Conditioner** on surfaces as a concentrate and wipe down with a cloth. Use daily on surfaces such as kitchen benches.

Spray into the air as a room odour conditioner.

When used frequently, **Light Surface Conditioner** can be diluted at the rate of 1:5 with good quality (structured) water.

Light Surface Conditioner can also be used with other cleaning agents.

Storage & handling

Store **Light Surface Conditioner** at room temperature and out of direct sunlight. Use within 18-24 months of opening.

Phi'on products are designed to address the fundamental link between healthy soils, plants, water, animals and humans.

Microbial balancing

Light Surface Conditioner works on the principle of microbial balancing. In Nature, all surfaces from the air, ground and underground are populated by three types of microbes: **Beneficial** (that help balance intestinal flora, boost immunity and fight disease); **Pathogenic** (that are involved in decay and the root cause of disease) and **Neutrals** (that collaborate with both beneficial and pathogenic microbes and on their own have neither a positive nor negative effect.)

All these microbes compete for space. A natural environment has all three groups in harmony, but when these populations are out of balance, any surface can become potentially infectious, or noxious with foul odours. It can become harmful when **pathogenic** microbes are dominating the environment. These situations can be corrected within minutes after applying **Light Surface Conditioner**.

How do other products compare?

Other commercial cleaning products can be used in conjunction with **Light Surface Cleaner & Conditioner** however this product is best used as a finishing product to restore microbial balance.

Why quality water matters

Light Surface Conditioner is made using MEA Water® Devices. This patented technology restructures and revitalises urban water by entraining a permanent negative charge to replicate the state of water in nature. This unique, environmentally friendly approach results in enhanced activation of beneficial microbes leading to safer high-quality cleaning. To find out more, visit www.meawater.com.

Disclaimer

This product can achieve the outcomes described above when used in accordance with the prescribed directions and advice.
