

Reflect Water Tank & Dam Conditioner Concentrate

What is it?

A liquid formulation to clean and condition water tanks, ponds, wells, dams, swimming pools and other outdoor water vessels, such as animal water troughs and more.

- Restores microbial balance in water, including wastewater
- Conditions washing machines and dishwashers
- Safely prevents pathogens from contaminating outdoor water containers

Ingredients

- Structured water using MEA Water ® Devices (www.meawater.com)
- Diverse and abundant range of beneficial microbe cultures
- Colloidal silver

How to use

Dilute **Reflect Water Tank & Dam Conditioner** at the rate of 1:10 water and spray around the edges of water bodies where the water meets the soil, vessel or container.

DO NOT pour **Reflect Water Tank & Dam Conditioner** concentrate into open water systems.

Best times to spray include before rain, during cloud cover and the cooler months of the year.

Storage & handling

Store **Reflect Water Tank & Dam Conditioner** at room temperature and out of direct sunlight. Use within 18-24 months of opening.

Microbial balancing

Reflect Water Tank & Dam Conditioner works on the principle of microbial balancing. In Nature, all surfaces from the air, ground and underground are populated by three types of microbes: **Beneficial** (that help balance intestinal flora, boost immunity and fight disease); **Pathogenic** (that are involved in decay and the root cause of disease) and **Neutrals** (that collaborate with both beneficial and pathogenic microbes and on their own have neither a positive nor negative effect.)

All these microbes compete for space. A natural environment has all three groups in harmony, but when these populations are out of balance, any surface can become potentially infectious, or noxious with foul odours. It can become harmful when **pathogenic** microbes are dominating the environment. These situations can be corrected within minutes after applying **Reflect Water Tank & Dam Conditioner**.

Colloidal silver is a powerful and natural antibacterial agent. It has been shown to significantly reduce pathogens by disabling their oxygen metabolism enzyme.

How do other products compare?

Reflect Water Tank & Dam Conditioner is specifically designed to treat open, sunlit water systems, including wastewater in multiple applications.

Why quality water matters

Reflect Water Tank & Dam Conditioner is made using MEA Water ® Devices patented technology that restructures and revitalises urban water by entraining a permanent negative charge to replicate the state of water in nature. This unique, environmentally friendly approach results in enhanced activation of beneficial microbes leading to a safe and high-quality conditioning treatment.
